Text input
The tutorial questions varied massively in difficulty - the first tutorial felt almost impossible, and the second and third were trivially easy. There were also issues with the tutorial questions not being uploaded soon enough (though can forgive Davide bc he had health issues). Some assessed work would have been useful.
Davide is great -- good at explaining concepts and engaging. There was less tutorial classes / problem sets for this module than all the other modules.
Davide is the best TA I have had during the MSc. So much effort put into each tutorial and he makes it fun. His explanations are also very useful
